PRESENTED BY California Teachers Association, In The Public Interest, Working Partnerships USA and Educate for the Future

Several significant changes were made to California’s Charter Schools Laws in the 2019 Legislative Session – come learn about what changes were made, and how to ensure that your district is implementing them.

Learn about new anti-discrimination, transparency and public access laws and how to ensure your district is enforcing them. The provisions in AB1505 allow for the first time for the community to weigh in and make the case that a new charter school is not in the interest of the whole community.

AB1505 made significant changes to charter authorization, renewal and appeals. Districts are now allowed to consider the fiscal impact to the district, as well as whether a new charter school is in the interest of the entire community. This new law also created clearer guidelines around charter renewal criteria, as well as limiting the role of the State Board of Education in the appeals process. Find out more about how to most effectively implement these provisions.

DATE: Thursday, May 21st 3:00 - 5:00 PM

To participate you will need to RSVP. Following registration, you will receive information on how to participate in the webinar.
